EXPERIENCE

Sommsation

UI Designer | February 2023 - Present

- Innovate and champion customer experience across all digital products.
- Partner with other members of the design team, Product Management and Engineering to expand and evolve the visual designs of digital products.
- Contribute throughout the UI design process by understanding current state, intake product requirements and business goals, brainstorming solutions, adding to the design system and designs of increasing fidelity to supply to the engineering teams.
- Develop and communicate visual and branding standards (fonts, colors, imagery, iconography, interaction, etc.) Design visual communication of concepts (develop visual designs, sketches, images, etc).
- Develop and communicate standard UI patterns.
- Prepare and present solutions to internal teams and key stakeholders.

Clayton Korte

Project Designer | June 2021 - October 2022

- Provided leadership and support on architectural project design and production, and secondarily on business development and office management.
- Assisted project design efforts within a collaborative team structure and contributed to the development of design concepts for design projects of all types and scales.
- Utilized freehand sketching, computer, and graphic resources to effectively analyze and convey design concepts or solutions.
- Produced design documentation at all phases of design while adhering to project budgets, schedules and deadlines.

Hall Architects

Summer Intern | 2018

- Worked closely with architects and designers as an integral part of the design team.
- Assisted project design efforts within a collaborative team structure.
- Practiced freehand sketching, computer, graphic, and modeling resources to assist project design efforts.
